**Key for items above**

- (1) Your current fax number(s) that you wish to transfer to atFAX. If you are not porting your number leave blank. New fax numbers will be allocated by atFAX.
- (2) Any customer link numbers that you wish to carry over to atFAX. Customer link numbers are numbers that have previously been set up by the customer associated or linked to their published fax numbers.
- (3) A single email address for fax reception. The customer may set up an email group per number if it wishes to receive fax to more than one email address.
- (4) The identification details you would like on your fax header (i.e. company name/dept. name/fax number).
- (5) The email addresses that you want to be able to send fax from.
- (6) This only applies if you have purchased the fax printing option.

**Printing Notes (Applicable to fax print option)**

Printers must be accessible from a central server/PC to run the automatic fax printing software  
 Email accounts used for reception need to be accessed by the automatic fax printer by POP3 or IMAP4

**Sending and receiving fax from your multifunction printer**

The multifunction printer(s) must be networked and set to scan to email externally in order to send and receive faxes.

**Disclaimer**

atFAX nor the Reseller are not responsible if telecommunication services are disconnected as a result of a request by the customer to port its number(s). This includes internet services and linked numbers.
